

SET YOUR IT FREE

Single-vendor networks are far more expensive to maintain than modern, multivendor networks

Federal agencies could save up to **\$5 billion** over the next five years

94%

of Federal network professionals

report savings from adding just one vendor to their network

spend less

get more

deliver better mission support

Better network performance

48% of those with diverse networks report better performance

HOW FREE IS YOUR IT?

The first step to breaking out of a proprietary network is to ask yourself:

- Is your network strategy dependent on one vendor's roadmap?
- Do you spend **60%** or more on hardware from one network provider?
- Does maintaining legacy infrastructure leave you with **20%** or less for new services?
